

NASEO: Resilience Through Innovative Fuels

Tucker Perkins, President & CEO,
Propane Education & Research
Council (PERC)

October 12, 2022

American Mariculture. Pine Island, FL. 9.29.2022

...as he drew nearer to his farm, he heard something that let him know everything was going to be alright. It was the hum of propane-powered generators. His team had turned all nine of them on before evacuating. They were pumping air into the tanks 4-5 million shrimp while also powering lights and other critical systems
