

## + State Interviews

- 14 Working Group members
- April and May 2019
- Covered:
  - The electricity system, its market, and regulatory structure
  - Roles of the State Energy Office, Public Utility Commission, and other agencies
  - Any pertinent demonstration projects or pilots are underway or planned
  - Whether state energy and electricity planning processes had included grid-interactive considerations

## + High-level Insights

- States want to learn about other states' experience and activities
- States are interested in GEB and load flexibility to help meet broader electricity and energy system objectives.
- States recognize that policy and regulatory factors can impede GEB

## + High-level Insights

---

- States are interested in applications for state and local buildings
- Many states want to understand how to value and assess the performance of GEB
- Some states indicate interest in expanding traditional energy efficiency programs to include other DERs, load flexibility, and electrification.

## + Discussion

---

- What types of state experiences are you looking to learn about?
- What other state goals can GEB serve?
- What is the value of GEB and to whom?
